Erasmus+ Project: INSPIRING DEAF YOUTH

TOP NEWS OF ENVISIO

PILOT TRIALS FOR ENVISIO DIGITAL HUB

> READ MORE

The ENVISIO Digital Hub pilot trials are officially starting across all partner countries! This important stage marks the transition from development to real-world implementation, during which learners, trainers, and deaf youth ambassadors will explore and evaluate the platform's inclusive learning features.

This pilot phase will play a key role in refining the Hub before its official public release, ensuring it meets the diverse needs of learners and supports equal access to quality green entrepreneurship training across Europe.

LEARNING, TEACHING & TRAINING ACTIVITIES

During 2025, the ENVISIO consortium completed two Learning, Teaching and Training Activities (LTTs), both of which played a vital role in advancing the project's goals of inclusive education, digital innovation, and sustainable entrepreneurship. These activities strengthened cooperation among partners and provided hands-on experience in developing and testing the educational tools that will shape the ENVISIO Digital Hub.

»»» NICOSIA – CREATING AUGMENTED REALITY CASE STUDIES

The second Learning, Teaching and Training Activity of ENVISIO was hosted in Nicosia, Cyprus, gathering representatives from all partner organisations for an intensive, in-person training session focused on creating Augmented Reality (AR) case studies.

The session aimed to equip participants with the practical knowledge and technical understanding required to transform complex sustainability and entrepreneurship concepts into interactive AR learning experiences that can engage both deaf youth and vocational trainers.

Partners received step-by-step guidance from MECB (Malta) — the consortium's partner specialising in digital technologies and immersive learning tools. The training explored:

- Techniques for designing accessible AR content,
- Best practices for embedding AR into educational materials for deaf learners,
- Strategies for combining visual storytelling and interactivity to reinforce learning outcomes.

Participants worked collaboratively to develop early AR prototypes aligned with the five ENVISIO training programmes on green entrepreneurship and sustainability. The workshop fostered creativity, knowledge exchange, and strong teamwork, ensuring that the produced content aligns with universal design principles and accessibility standards.

The LTT in Nicosia represented a significant milestone, as it bridged technical capacity-building with pedagogical creativity — turning ENVISIO's educational vision into tangible, digital learning resources.

LEARNING, TEACHING & TRAINING ACTIVITIES

»»» UŞAK- BUILDING ON OUTCOMES WITH INCLUSIVE HYBRID LEARNING

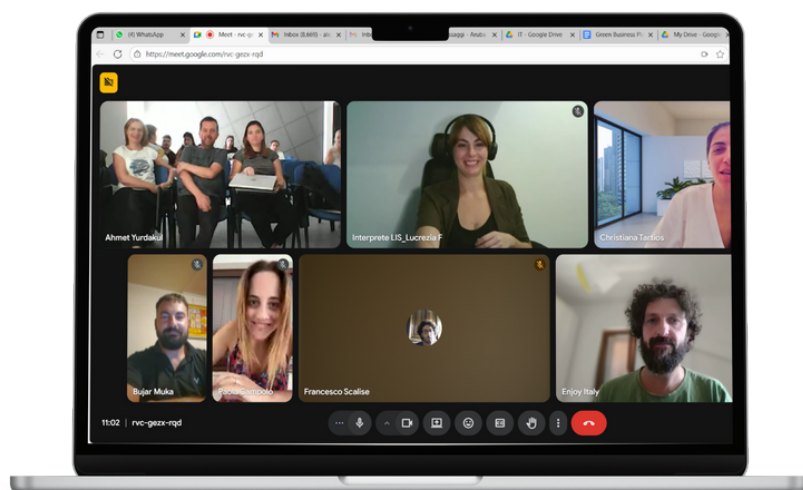

The third Learning, Teaching and Training Activity of ENVISIO, hosted in Uşak, Turkey, built on the outcomes of previous training sessions and introduced the project's most inclusive phase yet. This two-day event engaged deaf youth, sign-language interpreters, educators, and partner representatives in testing and adapting the ENVISIO Digital Hub and its training programmes for maximum accessibility, inclusiveness, and sustainability.

Participants explored the Hub's multilingual features, interactive components, and AR-based accessibility tools, offering constructive feedback on usability, design, and content clarity. Collaborative workshops encouraged brainstorming, co-design, and prototype testing, ensuring that every educational component was intuitive and engaging for diverse learners.

The event also provided a platform for peer learning among interpreters, trainers, and young participants, who shared personal insights on improving digital inclusion and sustainable learning practices. Through open dialogue, participants discussed how the ENVISIO Hub can serve as a bridge between entrepreneurship and equal opportunities.

During this activity, Deaf youth participants from Italy and Latvia who were unable to travel joined the sessions live online, supported by sign-language interpreters!

The partners' decision to adopt a hybrid learning format opened new opportunities for more participants from ENVISIO's target groups to engage in this hands-on experience focused on green entrepreneurship and sustainable innovation.

ENVISIO AT ÜNİDES DEVELOPMENT SUMMIT- 23 MAY 2025

On 23 May 2025, Uşak Halk Eğitimi Merkezi ve ASO proudly presented the ENVISIO Project during the ÜNİDES Development Summit (ÜNİDES Gelişim Zirvesi) held at Uşak University.

As part of the event, Uşak Halk Eğitimi Merkezi hosted a dedicated ENVISIO information stand, introducing participants to the project's goals, digital training programmes, and inclusive learning materials. The exhibition showcased ENVISIO's green entrepreneurship themes, sign-language-supported content, and interactive learning tools, all of which attracted significant interest from students, educators, and visitors attending the summit.

The summit provided an excellent platform to raise awareness about sustainability education and Deaf inclusion, aligning perfectly with ENVISIO's mission to empower young Deaf individuals through innovative and accessible learning experiences.

On 26 May 2025, Uşak Public Education Center proudly presented the ENVISIO Project at its annual year-end exhibition, hosting a dedicated stand to raise awareness about the project's goals and outcomes.

The event attracted nearly 1,000 visitors, including educators, learners, and members of the local community.

The highlight of the day was the visit of the Governor of Uşak, who showed great interest in the ENVISIO stand.

Project representatives provided detailed information about ENVISIO's focus on green entrepreneurship, sustainability education, and digital innovation, emphasising the Center's active role in disseminating the project's results to a wider audience.

WHAT'S NEXT

»»» UPCOMING ACTIVITIES

As the project moves into its final stages, the ENVISIO consortium is entering one of its most dynamic and exciting phases.

The Pilot Trials of the ENVISIO Digital Hub (WP5) are beginning soon, allowing learners, educators, Deaf youth, interpreters, and industry experts across all partner countries to explore the platform's training modules, interactive tools, and accessibility features. Through this process, participants will provide valuable feedback that will help partners fine-tune the platform before its official release.

In parallel, Multiplier Events will continue to take place across Europe, bringing together local communities, educators, youth organisations, and policymakers. These events will showcase ENVISIO's achievements and promote the long-term use of the Hub as a free, inclusive learning resource for all.

The project will conclude with the publication of the Final Newsletter, which will summarise the consortium's results, lessons learned, and impact on inclusive green entrepreneurship education. Participants who complete the ENVISIO training programme through the Hub will receive their Certificates of Participation, recognising their commitment to sustainability, innovation, and accessibility.

To stay informed, readers are encouraged to follow ENVISIO's official website and social media channels, where updates, success stories, and partner insights are shared regularly.
