ENVISIO 

Erasmus+ Project: INSPIRING DEAF YOUTH

TOP NEWS OF ENVISIO

PROJECT CONCLUSION STATEMENT

[> READ MORE](#)

As the ENVISIO project reaches its conclusion, we proudly reflect on a journey marked by collaboration, innovation, and shared commitment to empowering communities across Europe. Over the course of the project, partners worked together to advance green entrepreneurship, strengthen digital skills, and create accessible tools that support sustainable development at local and regional levels.

**ENVISIO CONCLUDES, BUT ITS VISION LIVES ON.
IN EVERY COMMUNITY, EVERY LEARNER, AND EVERY INITIATIVE INSPIRED BY THIS WORK.**

OUR NEWS

»»» GREEN ENTREPRENEURSHIP AWARENESS EVENT IN RURAL AREA OF NICOSIA

CKT Business Consulting Ltd, in November 2025, organised a Green Entrepreneurship Awareness Lecture in collaboration with the Community Council of Mitsero, as part of the ENVISIO Project (Erasmus+). The event brought together residents from the wider Mountainous Nicosia region, highlighting strong local interest in sustainability and community-driven innovation.

The event served as a valuable platform for information sharing and dialogue on green entrepreneurship, sustainable development, and community cooperation. Participants were introduced to the ENVISIO Digital Hub, a free online learning platform designed to empower young people and citizens to develop green ideas, entrepreneurial initiatives, and sustainable practices.

Through this initiative, ENVISIO continues to demonstrate that the green transition begins at community level—through collaboration, knowledge, and active participation. Mitsero and the Mountainous Nicosia region are showing that meaningful change can start locally, driven by action, inspiration, and a shared vision for a more sustainable future.

RADIO TALK SHOW

On November 2025, the ENVISIO project was featured on the Cyprus Broadcasting Corporation – 3rd Radio Channel (Τρίτο Πρόγραμμα ΡΙΚ) during the programme “Afternoon Coffee” (Απογευματινός Καφές) with hosts Alexia Karakanna and Christodoulos Christodoulou. A representative from CKT presented the ENVISIO Project, highlighting its mission to empower young people through green entrepreneurship, sustainable innovation, and community-driven environmental action.

The discussion focused on:

- the importance of equipping youth with green skills
- the role of local communities in the green transition
- the tools and opportunities offered through the ENVISIO Training Programme and Digital Hub

This media appearance contributed to raising public awareness about ENVISIO’s work and strengthening engagement with communities across Cyprus.

ENVISIO ATHLETE HEADS TO THE 25TH SUMMER DEAFLYMPICS IN TOKYO

We are delighted to share that Italian swimmer Noemi Canino, who has participated in several ENVISIO project activities, competed in the 25th Summer Deaflympics in Tokyo in November 2025.

ENVISIO WORKSHOP IN NICOSIA: EMPOWERING YOUTH IN GREEN ENTREPRENEURSHIP

CKT organised an interactive Green Entrepreneurship Workshop as part of ENVISIO, bringing together young participants interested in sustainability, innovation, and community-driven green initiatives. The workshop took place on February 2026 with participation for attendees aged 18–30.

The session introduced participants to:

- the ENVISIO Project and its objectives
- the formation of working groups
- the development of green business ideas
- guided registration and hands-on use of the ENVISIO Digital Hub

The event fostered collaboration, creativity, and active participation, reinforcing ENVISIO's mission to equip young people with the skills and confidence to contribute to a more sustainable future.

PARTICIPATION IN CLIMATHON NICOSIA 2026 & PRESENTATION OF GREEN INITIATIVES

ENVISIO had the honour of participating in Climathon Nicosia 2026 (March 2026), an annual event dedicated to climate action, innovation, and community-driven solutions for a more sustainable future. The Climathon provided an excellent platform for exchanging ideas, engaging with stakeholders, and highlighting how our initiatives contribute to Cyprus' broader climate and sustainability goals.

Our participation reflects our ongoing effort to support climate-positive actions and empower communities to adopt greener, more resilient practices.

ENVISIO EVENT IN VALMIERA: INSPIRING YOUTH THROUGH GREEN ENTREPRENEURSHIP

On March 2026, more than 95 participants gathered at the Valmiera Gauja Krasta Secondary School – Development Center for an event dedicated to green entrepreneurship and youth empowerment within the ENVISIO Project.

Students and teachers from Valmiera 2nd High School, Valmiera 5th High School, and Valmiera Viestura High School joined the session, creating a vibrant and diverse learning environment. Together, we explored what it means to be green and think green, how to take the first steps in starting a business, how to overcome fear, and how to identify one’s niche — including the advantages and challenges along the way.

Participants were inspired by real-life experiences shared by:

- Ieva Zariņa from VALPRO
- R Chocolate
- Raisa Jablonska from SIA Liepkalni

Their stories offered practical insights and motivation, demonstrating how sustainable thinking can be transformed into meaningful entrepreneurial action.

In the second part of the event, consortium partners from Malta and Cyprus showcased the capabilities of the new ENVISIO Training Centre, presented the educational materials available, and demonstrated the project’s augmented reality tools, giving participants a hands-on experience with innovative learning technologies.

»»» FINAL TRANSNATIONAL PROJECT MEETING IN LATVIA MARKS A KEY MILESTONE FOR ENVISIO

Following the event in Latvia on 27 March 2026, the ENVISIO consortium held its final face-to-face transnational project meeting, marking an important milestone as the project moves toward completion.

Partners Enjoy Italy, CKT Business Consulting, Kopa Varam, and MECB EU Partner came together to review the project's achievements, finalise remaining deliverables, and ensure a strong and sustainable legacy for ENVISIO. The meeting reaffirmed the consortium's shared commitment to empowering communities through digital innovation, green entrepreneurship, and inclusive capacity-building.

KEY OUTCOMES

- Final review of project deliverables and confirmation of completion timelines
- Quality assurance check across all outputs to ensure consistency and alignment with Erasmus+ standards
- Planning for sustainability, including post-project use of the ENVISIO Training Centre and Digital Hub
- Evaluation of pilot activities and integration of partner feedback
- Communication and dissemination wrap-up, ensuring visibility of results at EU and community level
- Agreement on final reporting procedures and responsibilities across the consortium

ENVISIO

PARTNERS' TAKEAWAYS

ENJOY ITALY

ENVISIO generated a double benefit for Enjoy Italy, both internally and externally. Internally, it strengthened staff competences in project management and partnership coordination, while expanding expertise in green entrepreneurship and Deaf-accessible digital education. Externally, the project enhanced the organisation's European visibility, enabling new collaborations and the integration of innovative practices into its training offer. Above all, it allowed us to connect with new passionate professionals and reinforce bonds with long-standing partners. The co-creation of the Digital Hub further enriched staff skills, boosted organisational innovation, and consolidated Enjoy Italy's commitment to inclusion, sustainability, and high-impact youth work.

KOPĀ VARAM! TOGETHER WE CAN!

During the project, while learning together with young people with hearing impairments, it was possible to observe significant personal growth among the participants. From passive observers, they gradually became genuinely engaged learners by participating in training activities, exploring the learning modules, discussing and reflecting on green entrepreneurship and sustainability. Over time, they developed into motivated and confident participants who are capable of making decisions about their own life paths and shaping their future and the environment around them.

Many young people and stakeholders also acknowledged that the project has already influenced their way of thinking. They have become more aware of how our daily behaviour, habits, and choices can impact not only our own future, but also the wellbeing of society and the environment in the years to come.

MACDAC ENGINEERING CONSULTANCY BUREAU LTD

MECB from Malta participated in the Erasmus+ ENVISIO project, which provided the opportunity to share its expertise with project partners in the development of Augmented Reality-based educational resources. Through the project, MECB also gained valuable insights into innovative approaches for promoting green entrepreneurship skills among youths, particularly those who are deaf or hard of hearing. Participation in ENVISIO further strengthened MECB's knowledge and experience in inclusive and sustainability-oriented education. In Malta, the project also enabled MECB to increase awareness and visibility on green entrepreneurship by engaging with local stakeholders through project activities, dissemination initiatives, and the organisation of a multiplier event.

ENVISIO

PARTNERS' TAKEAWAYS

USAK PUBLIC EDUCATION CENTER

As Uşak Public Education Center, being a partner in the ENVISIO Erasmus+ Project has brought valuable benefits to our organization by strengthening our capacity in inclusive education, sustainability, and green entrepreneurship. The project has helped us develop new approaches to supporting deaf and hard-of-hearing young people through accessible digital learning resources and innovative training methods. It has also enhanced our international cooperation experience and encouraged us to integrate sustainability-focused practices into lifelong learning. Through ENVISIO, we have gained practical tools, stronger awareness, and a more inclusive perspective to better empower young people and support their active participation in society.

CKT BUSINESS CONSULTING

For CKT, the most important takeaway from ENVISIO was the direct realisation that inclusive digital education is still unevenly developed across Europe, even in countries with strong educational systems. Through workshops, school visits, and testing the ENVISIO materials with Deaf and Hard-of-Hearing (DHH) learners, we saw very clearly that accessibility gaps are practical, everyday obstacles — not abstract policy issues.

This experience showed us exactly where learners struggle, such as navigating digital platforms without visual guidance, understanding content without sign-supported explanations and following learning sequences that are not broken into clear, visual steps.

Seeing these challenges firsthand gave CKT a much sharper understanding of what “inclusive design” must look like in practice.
